

Respondus LockDown Browser Student Quick Start Guide

Overview

Respondus LockDown Browser is a secure browser for taking tests in Blackboard. It prevents you from printing, copying, going to another URL, or accessing other applications during a test. If a Blackboard test requires that Respondus LockDown Browser be used, you will not be able to take a test with a standard web browser.

Respondus LockDown Browser should only be used for taking Blackboard tests, which require the use of LockDown Browser. It should not be used in other areas of Blackboard.

Download link for UTM students

Requirements for use

- IE 5.5 or higher (PC) or OSX 10.3.9 (Mac – Intel or PowerPC)
- Does not modify either browser in any way
- Installs a separate program that displays when started

A Partial List of Lockdown Features

Respondus LockDown Browser creates a “locked” testing environment for Blackboard assessments and includes the following features:

- Assessments are displayed full-screen and cannot be minimized
- Assessments cannot be exited until submitted by users for grading
- Task switching or access to other applications is prevented
- Printing functions are disabled
- Print Screen and capturing functions are disabled
- Copying and pasting anything to and from an assessment is prohibited
- Right-click menu options are disabled (Windows); key + click options are disabled (Macintosh)
- Browser menu and toolbar options are disabled except Back, Forward, Refresh and Stop
- Function keys (F1-F12) are disabled
- Source code for the HTML page cannot be viewed
- URLs cannot be typed by the user
- Hundreds of screen capture, messaging, screen-sharing and network monitoring applications are blocked from running
- The browser automatically starts at the institution’s login page for Blackboard
- Links in questions that point to other servers don’t compromise the “locked” testing environment
- Pages from the assessment aren’t cached or stored in the browser’s history listing

Instructions for Students

- Close all programs, unless one is used to connect you to the Internet.
- Locate the "LockDown Browser" shortcut on the desktop and double-click it. Mac users, launch "LockDown Browser" from the Applications folder.
- If prompted to close a blocked program (e.g. screen capture, instant messaging), choose 'Yes' when prompted.
- Login to your Blackboard course.
- Navigate to the test and select it.
- A pop-up window will ask whether the instructor has required a password for the test. If so enter it to take the exam. If not, click 'No' and then the 'Continue' button.
- Regardless of the selection made in the previous step, Respondus LockDown Browser will automatically fill in a special password on the next screen. It's important that this password field isn't modified. Click 'Submit'.
- The test will then start. (Note: once a test has been started with Respondus Lockdown Browser, you cannot exit until the 'Submit' button is clicked.)
