Majors, Concentrations and Options

Bachelor of Science in Agriculture
- Agricultural Business
- Agribusiness
- Farm and Ranch Management
- Agricultural Technology
  - Agricultural Engineering Technology
  - Precision Agriculture Technology
- Agricultural Science
- Agricultural Production
- Professional Education
- Agricultural Communications
- Biofuels
- Animal Science
  - Production, Business and Management
- Veterinary Health Technology
- Animal and Veterinary Sciences
- Plant and Soil Science
- Crop and Soil Management
- Golf Course and Landscape Management

Bachelor of Science in Natural Resources Management
- Environmental Management
- Park Administration
- Soil and Water Conservation
- Wildlife and Fisheries Biology
  - Wildlife Science
  - Fisheries Science

Bachelor of Science (with a major in Geoscience)
- Geography
- Geology
- Meteorology

The Department offers B.S. degrees in three majors: Agriculture, Geosciences, and Natural Resources Management. Certification programs are offered in Geographic Information Systems (GIS), International Agriculture (IACP), Land Surveying and Geomatics (LSGC).

The department is dedicated to introducing students to the full array of disciplines within each program. Courses are offered which collectively provide experiential training in theory, concepts, research skills, data collection, laboratory-based analyses, fieldwork, technical writing and oral presentations with hands-on, practical learning opportunities.
I want to be...

Agricultural Engineer
Agronomist
Archeologist
Atmospheric Scientist
Biofuels Engineer
Business Owner
Cartographer
Climatologist
Crop Consultant
Energy Consultant
Entrepreneur
Environmental Geologist
Farmer
Farm Manager
Fisheries Biologist
Geochemist
Glaciologist
Historic Preservationist
Horticulturalist
Hydrogeologist
Hydrologist
Instrumentation Specialist
Landscape Architect
Meteorologist
Paleoceanographers
Paleoclimatologist
Park Ranger
Petrologist
Plant and Soil Scientist
Sedimentologist
Seismologist
Stratigrapher
Veterinarian
Veterinary Technologist
Wetland Specialist
Wildlife Biologist

Graduate Programs
Master of Science in Agriculture and Natural Resources
with three concentrations:
Agribusiness & Risk Management
Natural Resources Systems Management
System Science in Agriculture

Scholarships
Departmental scholarships are available to AGN students who meet specific eligibility criteria. Application forms should be done for each academic year and submitted online using UT Martin Scholarship Aviator. For more information and scholarship application forms visit the university’s website: https://utm.academicworks.com
