

## Student Web Space Connection for Macintosh Computers

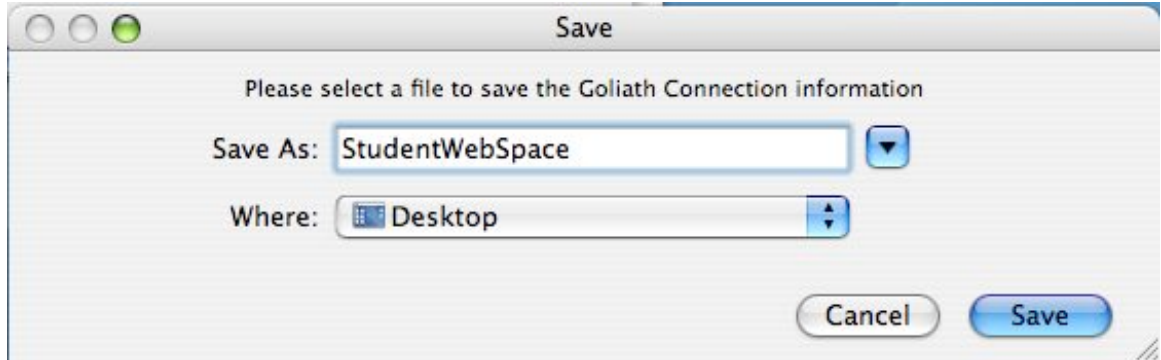

1. Download the Goliath WebDAV client from <http://www.webdav.org/goliath/>.
2. Install according to the instructions provided with Goliath.
3. Open Goliath and configure your first connection. The URL will be <https://webdav.utm.edu/students/username>. Your username will be of the form mar-ut-lab\username. In all instances, username is the same as your myUTMartin Portal or email login. Expand the Advanced Settings by clicking on the arrow. Check the box next to “Disable encoding of Macintosh Resources.” Click OK.

4. Connect to your webspace and verify that you can access it. Install the certificate and click OK.

5. Save the Goliath connection to a place you can find.

6. Use your saved connection to connect in the future.
