Family and Consumer Sciences

Assessment Handbook

Version 06
edTPA stems from a twenty-five-year history of developing performance-based assessments of teaching quality and effectiveness. The Teacher Performance Assessment Consortium (Stanford and AACTE) acknowledges the National Board for Professional Teaching Standards, the Interstate Teacher Assessment and Support Consortium, and the Performance Assessment for California Teachers for their pioneering work using discipline-specific portfolio assessments to evaluate teaching quality. This version of the handbook has been developed with thoughtful input from over six hundred teachers and teacher educators representing various national design teams, national subject matter organizations (ACEI, ACTFL, AMLE, CEC, IRA, NAEYC, NAGC, NCSS, NCTE, NCTM, NSTA, SHAPE America), and content validation reviewers. All contributions are recognized and appreciated.

This document was authored by the Stanford Center for Assessment, Learning, and Equity (SCALE) with editorial and design assistance from Evaluation Systems.

Introduction to edTPA Family and Consumer Sciences

Purpose

The purpose of edTPA Family and Consumer Sciences, a nationally available performance-based assessment, is to measure novice teachers’ readiness to teach family and consumer sciences. The assessment is designed with a focus on student learning and principles from research and theory. It is based on findings that successful teachers

- develop knowledge of subject matter, content standards, and subject-specific pedagogy
- develop and apply knowledge of varied students’ needs
- consider research and theory about how students learn
- reflect on and analyze evidence of the effects of instruction on student learning

As a performance-based assessment, edTPA is designed to engage candidates in demonstrating their understanding of teaching and student learning in authentic ways.

Overview of the Assessment

The edTPA Family and Consumer Sciences assessment is composed of three tasks:

1. Planning for Instruction and Assessment
2. Instructing and Engaging Students in Learning
3. Assessing Student Learning

For this assessment, you will plan 3–5 consecutive family and consumer sciences lessons (or, if teaching within a large time block, 3–5 hours of connected instruction) referred to as a learning segment. Lessons should build upon and reflect appropriate state and/or national family and consumer sciences standards. A learning segment prepared for this assessment should reflect a balanced approach to family and consumer sciences. This means your segment should include learning tasks where students have opportunities to organize and structure work while drawing upon family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies.

---

If students are spending several lessons working independently on the investigation or creation of a product or project, then you may extend the learning segment (no more than 10 hours). The learning segment should then consist of about 3–5 hours of instruction, and the remaining 5–7 hours monitoring and supporting students as they work.

You will then teach the learning segment, making a videorecording of your interactions with students during instruction. You will also assess, informally and formally, students’ learning throughout the learning segment. Upon completion of the three tasks, you will submit artifacts from the tasks (e.g., lesson plans, clips from your videorecording, assessment materials, instructional materials, student work samples), as well as commentaries that you have written to explain and reflect on the Planning, Instruction, and Assessment components of the tasks. The artifacts and commentaries for each task will then be evaluated using rubrics especially developed for each task.

Family and consumer sciences is an integrative discipline within career and technical education. The content of this discipline focuses on perennial issues faced across a lifespan that affects individuals, families, and communities. Career and technical skill development and problem-solving strategies are used in relationship to these issues and in specific workplace preparation.

As part of family and consumer sciences, the process skills of leadership, management, communication, and problem solving are developed through participation in a variety of classroom and student leadership experiences (e.g., Family, Career, and Community Leaders of America2).

**The edTPA Tasks and the Cycle of Effective Teaching**

The three edTPA tasks represent a cycle of effective teaching (i.e., teaching that is focused on student learning). Planning Task 1 documents your intended teaching, Instruction Task 2 documents your enacted teaching, and Assessment Task 3 documents the impact of your teaching on student learning.

---

2 The FCCLA is a youth leadership organization associated with Family and Consumer Sciences Education (www.fcclainc.org). FCCLA offers a framework and curriculum for teaching youth to become leaders in their schools, families, and communities.
The three tasks and the evidence you provide for each are framed by your understandings of your students and their learning. As you develop, document, and teach your lessons, you will reflect upon the cyclical relationship among planning, instruction, and assessment with a focus on your students’ learning needs.

Evidence of Teaching Practice: Artifacts and Commentaries
An essential part of edTPA is the evidence you will submit of how you planned, taught, and assessed your lessons to deepen student learning in family and consumer sciences. This evidence includes both artifacts and commentaries:

- **Artifacts** represent authentic work completed by you and your students. These include lesson plans, copies of instructional and assessment materials, video clips of your teaching, and student work samples.

- **Commentaries** are your opportunity to describe your artifacts, explain the rationale behind their choice, and analyze what you have learned about your teaching practice and your students’ learning. Note that although your writing ability will not be scored directly, commentaries must be clearly written and well focused.

When preparing your artifacts and commentaries, refer to the rubrics frequently to guide your thinking, planning, and writing. Refer to the [Family and Consumer Sciences Evidence Chart](#) for information about how your evidence should be formatted for electronic submission.
Evaluation Criteria
The rubrics used to score your performance on edTPA are included in the handbook, following the sections describing the directions for each task. The descriptors in the five-level rubrics address a wide range of performance, beginning with the knowledge and skills of a novice not ready to teach (Level 1) and extending to the advanced practices of a highly accomplished beginner (Level 5).

Structure of the Handbook
The following pages provide specific instructions on how to complete each of the three tasks of the edTPA Family and Consumer Sciences assessment. After an overview of the tasks, the handbook provides instructions for each task, organized into four sections:

1. What Do I Need to Think About?
   This section provides focus questions for you to think about when completing the task.

2. What Do I Need to Do?
   This section provides specific and detailed directions for completing the task.

3. What Do I Need to Write?
   This section tells you what you need to write, and also provides specific and detailed directions for writing the commentary for the task.

4. How Will the Evidence of My Teaching Practice Be Assessed?
   This section includes the rubrics that will be used to assess the evidence you provide for the task.

Additional requirements and resources are provided for you in this handbook:

- **Professional Responsibilities**: guidelines for the development of your evidence
- **Family and Consumer Sciences Context for Learning Information**: prompts used to collect information about your school/classroom context
- **Family and Consumer Sciences Evidence Chart**: specifications for electronic submission of evidence (artifacts and commentaries), including templates, supported file types, number of files, response length, and other important evidence specifications
- **Glossary**: definitions of key terms can be accessed by rolling your cursor over each glossary term marked with a dotted underline throughout the handbook or by referring to the **Family and Consumer Sciences Glossary**.

You should review the **Making Good Choices** document prior to beginning the planning of the learning segment. If you are in a preparation program, it will have additional resources that provide guidance as you develop your evidence.
Review all instructions carefully before beginning to teach the learning segment to ensure that you are well prepared for all tasks. **Before you record your videos, pay particular attention to the specific content focus of each video clip submission; these foci are described in the What Do I Need to Do? sections in Instruction Task 2 and Assessment Task 3.** Refer to the [Professional Responsibilities](#) section of this handbook for important information about permissions, confidentiality, and other requirements.

If your program requires you to submit artifacts and commentaries for official scoring, refer to [www.edTPA.com](http://www.edTPA.com) for complete and current information before beginning your work and to download templates for submitting materials. The website contains information about the registration process, submission deadlines, submission requirements, withdrawal/refund policies, and score reporting. It also provides contact information should you have questions about your registration and participation in edTPA.

Whether submitting directly to [www.edTPA.com](http://www.edTPA.com) or via your program’s electronic portfolio management system, follow the submission guidelines as documented in the Evidence Chart and review [edTPA Submission Requirements](#) to ensure that your materials conform to the required evidence specifications and requirements for scoring.

<td>Assessment Rubrics</td>
</tr>
<tr>
<td>- Submit the evaluation criteria you will use to analyze student learning.</td>
<td>Part B: Evidence of Feedback</td>
<td>Rubric 11: Analysis of Student Learning</td>
</tr>
<tr>
<td>- Collect and analyze student work to identify quantitative and qualitative patterns of learning within and across learners in the class.</td>
<td>Part C: Assessment Commentary</td>
<td>Rubric 12: Providing Feedback to Guide Learning</td>
</tr>
<tr>
<td>- Select 3 student work samples to illustrate your analysis of the patterns of learning within and across learners in the class. At least 1 of the samples must be from a student with specific learning needs. These 3 students will be your focus students.</td>
<td>Part D: Evaluation Criteria</td>
<td>Rubric 13: Student Understanding and Use of Feedback</td>
</tr>
<tr>
<td>- Summarize the learning of the whole class, referring to work samples from the 3 focus students to illustrate patterns in student understanding across the class.</td>
<td></td>
<td>Rubric 14: Analyzing Students’ Language Use and Learning in Family and Consumer Sciences</td>
</tr>
<tr>
<td>- Submit feedback for the work samples for the 3 focus students in written, audio, or video form.</td>
<td></td>
<td>Rubric 15: Using Assessment to Inform Instruction</td>
</tr>
<tr>
<td>- Analyze evidence of students’ language use from (1) the video clips from Instruction Task 2, (2) an additional video clip of one or more students using language within the learning segment, AND/OR (3) the student work samples from Assessment Task 3.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Analyze evidence of student learning, and plan for next steps by responding to commentary prompts.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Planning Task 1: Planning for Instruction and Assessment

What Do I Need to Think About?

In Planning Task 1, you will describe your plans for the learning segment and explain how your instruction is appropriate for the students and the content you are teaching. As you develop your plans, you need to think about the following:

- What do your students know, what can they do, and what are they learning to do?
- What do you want your students to learn? What are the important understandings and core concepts, career and technical skills, and problem-solving strategies you want students to develop within the learning segment?
- How will you use your knowledge of your students’ assets to inform your plans?
- What instructional strategies, learning tasks, and assessments will you design to support student learning and language use?
- How will your learning segment support students to develop and use language that deepens content understanding?
- How is the teaching you propose supported by research and theory about how students learn?

What Do I Need to Do?

- **Select a class.** If you teach more than one class, select one focus class for this assessment. If your placement for family and consumer sciences has you responsible for a group rather than a whole class, plans should describe instruction for that group (minimum of 4 students). That group will constitute “the whole class” for edTPA.
- **Provide context information.** The Family and Consumer Sciences Context for Learning Information form is provided later in this handbook and must be submitted in a template. This form provides essential information about your students and your school/classroom. The context information you submit should be no more than 4 pages, including the prompts.
- **Identify a learning segment to plan, teach, and analyze.** Review the curriculum with your cooperating teacher and select a learning segment of 3–5 consecutive lessons. (If teaching family and consumer sciences within a large time block, select a learning segment of about 3–5 hours of connected instruction.)
- **Identify a central focus.** Identify the central focus along with the content standards and objectives you will address in the learning segment. The central focus should support students in developing, organizing, and structuring work while drawing upon family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies.
If students are spending several lessons working independently on the investigation or creation of the product or project, then you may extend the learning segment (no more than 10 hours), with about 3–5 hours of instruction and the rest spent monitoring and supporting students as they work.

- **Identify and plan to support language demands.** Select a key language function from your learning objectives. Choose a learning task that provides opportunities for students to practice using that language function. Identify additional language demands associated with that task. Plan targeted supports that address the identified language demands, including the language function.

- **Write a lesson plan** for each lesson in the learning segment. Your lesson plans should be detailed enough that a substitute or other teacher could understand them well enough to use them.

- **Your lesson plans must include the following information,** even if your teacher preparation program requires you to use a specific lesson plan format:
  - State-adopted student academic content standards that are the target of student learning (Note: Please include the number and text of each standard that is being addressed. If only a portion of a standard is being addressed, then only list the part or parts that are relevant.)
  - Learning objectives associated with the content standards
  - Formal and informal assessments used to monitor student learning, including type(s) of assessment and what is being assessed
  - Instructional strategies and learning tasks (including what you and the students will be doing) that support diverse student needs
  - Instructional resources and materials used to engage students in learning

- **Each lesson plan must be no more than 4 pages in length.** You will need to condense or excerpt lesson plans longer than 4 pages. Any explanations or rationale for decisions should be included in your Planning Commentary and deleted from your plans.

- **Respond to the commentary prompts** listed in the Planning Commentary section below prior to teaching the learning segment.

- **Submit your original lesson plans.** If you make changes while teaching the learning segment, you may offer reflection on those changes in the Instruction Task 2 and Assessment Task 3 Commentaries.

- **Select and submit key instructional materials** needed to understand what you and the students will be doing (no more than 5 additional pages per lesson plan). The instructional materials might include such items as class handouts, assignments, slides, and interactive whiteboard images.

- **Submit copies of all written assessments and/or directions for any oral or performance assessments.** (Submit only the blank assessment given to students; do not submit student work samples for this task.)

- **Provide citations for the source of all materials that you did not create** (e.g., published texts, websites, and material from other educators). List all citations by lesson.
number at the end of the Planning Commentary. Note: Citations do not count toward the commentary page limit.

See the Planning Task 1: Artifacts and Commentary Specifications in the Family and Consumer Sciences Evidence Chart for instructions on electronic submission of evidence. This evidence chart identifies templates, supported file types, number of files, response length, and other important evidence specifications. Your evidence cannot contain hyperlinked content. Any web content you wish to include as part of your evidence must be submitted as a document file, which must conform to the file format and response length requirements.

What Do I Need to Write?

In Planning Task 1, you will write

- a description of your Context for Learning (see “What Do I Need to Do?” above for directions)
- lesson plans (see “What Do I Need to Do?” above for directions)
- a commentary explaining your plans (see “Planning Commentary” below for directions)

Planning Commentary

In Planning Task 1, you will write a commentary, responding to the prompts below. Your commentary should be no more than 9 single-spaced pages, including the prompts.

1. Central Focus
   a. Describe the central focus and purpose of the content you will teach in the learning segment.
   b. Given the central focus, describe how the standards and learning objectives within your learning segment address the following family and consumer sciences-relevant components:
      - conceptual understanding
      - career and technical skills
      - problem-solving strategies
   c. Explain how your plans build on each other to help students make connections between family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies as they develop, structure, and organize their work.

2. Knowledge of Students to Inform Teaching
   For each of the prompts below (2a–b), describe what you know about your students with respect to the central focus of the learning segment.
Consider the variety of learners in your class who may require different strategies/support (e.g., students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students).

a. Prior academic learning and prerequisite skills related to the central focus—Cite evidence of what students know, what they can do, and what they are still learning to do.

b. Personal, cultural, or community assets related to the central focus—What do you know about your students’ everyday experiences, cultural and language backgrounds and practices, and interests?

3. Supporting Students’ Learning of Family and Consumer Sciences

Respond to prompts 3a–c below. To support your justifications, refer to the instructional materials and lesson plans you have included as part of Planning Task 1. In addition, use principles from research and/or theory to support your justifications.

a. Justify how your understanding of your students’ prior academic learning and personal, cultural, and community assets (from prompts 2a–b above) guided your choice or adaptation of learning tasks and materials. Be explicit about the connections between the learning tasks and students’ prior academic learning, their assets, and research/theory.

b. Describe and justify why your instructional strategies and planned supports are appropriate for the whole class, individuals, and/or groups of students with specific learning needs.

Consider the variety of learners in your class who may require different strategies/support (e.g., students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students).

c. Describe common attitudes, preconceptions, or misunderstandings within your content focus and how you will address them.

4. Supporting Development in Family and Consumer Sciences Through Language

As you respond to prompts 4a–d, consider the range of students’ language assets and needs—what do students already know, what are they struggling with, and/or what is new to them?

a. Language Function. Using information about your students’ language assets and needs, identify one language function essential for students to engage in learning tasks related to your central focus. Listed below are some sample language functions. You may choose one of these or another more appropriate for your learning segment.

<table>
<thead>
<tr>
<th>Analyze</th>
<th>Argue</th>
<th>Categorize</th>
<th>Compare/contrast</th>
<th>Describe</th>
</tr>
</thead>
<tbody>
<tr>
<td>Explain</td>
<td>Interpret</td>
<td>Predict</td>
<td>Question</td>
<td>Summarize</td>
</tr>
</tbody>
</table>
b. Identify a key learning task from your plans that provides students with opportunities to practice using the language function. Identify the lesson in which the learning task occurs. (Give lesson/day number.)

c. **Additional Language Demands.** Given the language function and learning task identified above, describe the following associated language demands (written or oral) students need to understand and/or use:

- **Vocabulary**
- **Plus** at least one of the following:
  - **Syntax**
  - **Discourse**

d. **Language Supports.** Refer to your lesson plans and instructional materials as needed in your response to the prompt.

- Identify and describe the planned instructional supports (during and/or prior to the learning task) to help students understand, develop, and use the identified language demands (function, vocabulary, and syntax or discourse).

5. **Monitoring Student Learning**

In response to the prompts below, refer to the assessments you will submit as part of the materials for Planning Task 1.

a. Describe how your planned formal and informal assessments will provide direct evidence of students’ understanding of family and consumer sciences-relevant concepts, career and technical skills, **AND** problem-solving strategies **throughout** the learning segment.

b. Explain how the design or adaptation of your planned assessments allows students with specific needs to demonstrate their learning.

Consider the variety of learners in your class who may require different strategies/support (e.g., students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students).

**How Will the Evidence of My Teaching Practice Be Assessed?**

For Planning Task 1, your evidence will be assessed using rubrics 1–5, which appear on the following pages. When preparing your artifacts and commentaries, refer to the rubrics frequently to guide your thinking, planning, and writing.
Planning Rubrics

Rubric 1: Planning for Family and Consumer Sciences Understandings

How do the candidate’s plans build students’ understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?

<table>
<thead>
<tr>
<th>Level 1&lt;sup&gt;4&lt;/sup&gt;</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidate’s plans for instruction <strong>focus solely on</strong> family and consumer sciences-relevant concepts <strong>without connections to</strong> • career and technical skills OR • problem-solving strategies.</td>
<td>Candidate’s plans for instruction <strong>support student learning of</strong> family and consumer sciences-relevant concepts <strong>with vague connections to</strong> • career and technical skills OR • problem-solving strategies.</td>
<td>Candidate’s plans for instruction <strong>build on each other</strong> to support learning of family and consumer sciences-relevant concepts <strong>with clear connections to</strong> • career and technical skills <strong>AND/OR</strong> • problem-solving strategies.</td>
<td>Candidate’s plans for instruction build on each other to support learning of family and consumer sciences-relevant concepts with clear and consistent connections to • career and technical skills <strong>AND</strong> • problem-solving strategies.</td>
<td>Level 4 plus: Candidate explains how s/he will use learning tasks and materials to lead students to make clear and consistent connections.</td>
</tr>
</tbody>
</table>

OR

There are **significant content inaccuracies** that will lead to student misunderstandings.

OR

Standards, objectives, and learning tasks and materials are **not aligned with each other**.

<sup>4</sup> Text representing key differences between adjacent score levels is shown in bold. Evidence that does not meet Level 1 criteria is scored at Level 1.
Rubric 2: Planning to Support Varied Student Learning Needs

How does the candidate use knowledge of his/her students to target support for students to develop understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Language demands identified by the candidate are not consistent with the selected language function OR task. OR Language supports are missing or are not aligned with the language demand(s) for the learning task.</td>
<td>Language supports primarily address one language demand (vocabulary, function, syntax, or discourse).</td>
<td>General language supports address use of two or more language demands (vocabulary, function, syntax, discourse).</td>
<td>Targeted language supports address use of • vocabulary, • language function, AND • one or more additional language demands (syntax, discourse).</td>
<td>Level 4 plus: Language supports are designed to meet the needs of students with different levels of language learning.</td>
</tr>
</tbody>
</table>

---

5 Language demands include: language function, vocabulary, syntax, and discourse (organizational structures, text structure, etc.).

6 Language function refers to the learning outcome (verb) selected in prompt 4a (e.g., analyze, interpret).
# Rubric 5: Planning Assessments to Monitor and Support Student Learning

**How are the formal and informal assessments selected or designed to monitor students’ understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?**

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
</table>
| The assessments **only provide evidence of students' understanding of family and consumer sciences-relevant**  
- concepts OR  
- career and technical skills.  
**OR**  
Candidate does not attend to ANY ASSESSMENT requirements in IEPs and 504 plans. |
| The assessments **provide limited evidence to monitor students' understanding of family and consumer sciences-relevant**  
- concepts,  
- career and technical skills, **OR**  
- problem-solving strategies during the learning segment. |
| The assessments **provide evidence to monitor students' understanding of family and consumer sciences-relevant**  
- concepts AND  
- career and technical skills **AND/OR** problem-solving strategies during the learning segment. |
| The assessments provide **multiple forms of evidence** to monitor students' understanding of family and consumer sciences-relevant  
- concepts,  
- career and technical skills, **AND**  
- problem-solving strategies **throughout** the learning segment. |
| **Level 4 plus:**  
The assessments are strategically designed to allow individuals or groups with specific needs to demonstrate their learning. |
Instruction Task 2: Instructing and Engaging Students in Learning

What Do I Need to Think About?

In Instruction Task 2, you will demonstrate how you support and engage students in learning. Before you begin your instruction, you need to think about the following:

- What kind of learning environment do you want to develop in order to establish respect and rapport, and to support students’ engagement in learning?
- What kinds of learning tasks actively engage students in the central focus of the learning segment?
- How will you elicit and build on student responses in ways that develop and deepen content understanding?
- In what ways will you connect new content to your students’ prior academic learning and personal, cultural, or community assets during your instruction?
- How will you use evidence from your instruction to examine and change your teaching practices to more effectively meet a variety of student learning needs?

What Do I Need to Do?

- Obtain required permissions for videorecording. Before you record your video, ensure that you have the appropriate permission from the parents/guardians of your students and from adults who appear in the video. Adjust the camera angle to exclude individuals for whom you do not have permission to film.
- Examine your plans for the learning segment and identify challenging learning tasks in which you and students are actively engaged. The video clips you select for submission should provide a sample of how you interact with students to develop understanding of family and consumer sciences-relevant concepts, career and technical skills, and/or problem-solving strategies as they structure and organize their work or complete a product or project.
- Identify lessons to videorecord.
- Provide 2 video clips (no more than 10 minutes each, but not less than 3 minutes combined) that demonstrate how you interact with students in a positive learning environment to develop understanding of family and consumer sciences-relevant concepts, career and technical skills, and/or problem-solving strategies.
  - The first clip should illustrate how you introduced and engaged students in family and consumer sciences-relevant concepts, career and technical skills, and/or problem-solving strategies.
  - The second clip should illustrate how you actively engaged students in family and consumer sciences-relevant concepts, career and technical skills, and/or problem-solving strategies.
solving strategies as they develop, organize, or structure their work or complete a project or product.

**Optional** Provide evidence of students' language use. You may provide evidence of language use from your video clips from Instruction Task 2, an additional video clip of one or more students using language within the learning segment (no more than 5 minutes in length), AND/OR through the student work samples analyzed in Assessment Task 3.

Determine whether you will feature the whole class or a targeted group of students (minimum of 4 students) within the class.

**Videorecord your classroom teaching.** Tips for videorecording your class are available from your teacher preparation program.

**Select video clips to submit** and verify that each clip meets the following requirements:

- Check the video and sound quality to ensure that you and your students can be seen and heard on the video clips you submit. If most of the audio in a clip cannot be understood by a scorer, **submit another clip**. If there are occasional audio portions of a clip that cannot be understood that are relevant to your commentary responses, do one of the following: 1) provide a transcript with time stamps of the inaudible portion and refer to the transcript in your response; 2) embed quotes with time-stamp references in the commentary response; or 3) insert captions in the video (captions for this purpose will be considered permissible editing).
- A video clip must be continuous and unedited, with no interruption in the events.
- If you have inadvertently included individuals for whom you do not have permission to film in the video clip(s) you plan to submit, you may use software to blur the faces of these individuals. This is not considered editing. Other portions of the submitted video clip(s), including the classroom, your face, and the faces of individuals for whom you have obtained permission to film, should remain unblurred.
- Do not include the name of the state, school, or district in your video. Use first names only for all individuals appearing in the video.

**Respond to the commentary prompts** listed in the Instruction Commentary section below after teaching the learning segment.

**Determine if additional information is needed to understand what you and the students are doing in the video clips.** For example, if there are graphics, texts, or images that are not clearly visible in the video, or comments that are not clearly heard, you may insert digital copies or transcriptions at the end of the Instruction Commentary (no more than 2 pages in addition to the responses to commentary prompts).

See the **Instruction Task 2: Artifacts and Commentary Specifications** in the Family and Consumer Sciences Evidence Chart for instructions on electronic submission of evidence. This evidence chart identifies templates, supported file types, number of files, response length, and other important evidence specifications. Your evidence cannot contain hyperlinked content. Any web content you wish to include as part of your evidence must be submitted as a document file, which must conform to the file format and response length requirements.
What Do I Need to Write?

Instruction Commentary

In Instruction Task 2, you will write a commentary, responding to the prompts below. Your commentary should be no more than 6 single-spaced pages, including the prompts. If needed, insert no more than 2 additional pages of supporting documentation for the videorecordings at the end of the commentary (e.g., digital copies of indiscernible materials or transcriptions of inaudible comments). These additional pages do not count toward the commentary page limit noted above.

1. Which lesson or lessons are shown in the video clips? Identify the lesson(s) by lesson plan number.

2. Promoting a Positive Learning Environment
   Refer to scenes in the video clips where you provided a positive learning environment.
   a. How did you demonstrate mutual respect for, rapport with, and responsiveness to students with varied needs and backgrounds, and challenge students to engage in learning?

3. Engaging Students in Learning
   Refer to examples from the video clips in your responses to the prompts.
   a. Explain how your instruction engaged students in developing understanding of family and consumer sciences-relevant
      ▪ concepts
      ▪ career and technical skills
      ▪ problem-solving strategies
   b. Describe how your instruction linked students’ prior academic learning and personal, cultural, and community assets with new learning.

4. Deepening Student Learning during Instruction
   Refer to examples from the video clips in your explanations.
   a. Explain how you elicited and built on student responses to promote thinking and develop understanding of family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.
   b. Explain how your use of instructional strategies/methods and materials helped students develop an understanding of family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.

5. Analyzing Teaching
   Refer to examples from the video clips in your responses to the prompts.
   a. What changes would you make to your instruction—for the whole class and/or for students who need greater support or challenge—to better support student learning of the central focus (e.g., missed opportunities)?
Consider the variety of learners in your class who may require different strategies/support (e.g., students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students).

b. Why do you think these changes would improve student learning? Support your explanation with evidence of student learning AND principles from theory and/or research.

How Will the Evidence of My Teaching Practice Be Assessed?

For Instruction Task 2, your evidence will be assessed using rubrics 6–10, which appear on the following pages. When preparing your artifacts and commentaries, refer to the rubrics frequently to guide your thinking, instruction, and writing.
### Rubric 6: Learning Environment

How does the candidate demonstrate a positive learning environment that supports students’ engagement in learning?

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>The clips reveal evidence of disrespectful interactions between teacher and students or between students.</td>
<td>The candidate demonstrates respect for students. AND Candidate provides a learning environment that serves primarily to control student behavior, and minimally supports the learning goals.</td>
<td>The candidate demonstrates rapport with and respect for students. AND Candidate provides a positive, low-risk learning environment that reveals mutual respect among students.</td>
<td>The candidate demonstrates rapport with and respect for students. AND Candidate provides a challenging learning environment that promotes mutual respect among students.</td>
<td>The candidate demonstrates rapport with and respect for students. AND Candidate provides a challenging learning environment that provides opportunities to express varied perspectives and promotes mutual respect among students.</td>
</tr>
</tbody>
</table>
**Rubric 7: Engaging Students in Learning**

How does the candidate actively engage students in developing understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students are <strong>participating</strong> in tasks or behaviors that are vaguely or superficially connected to family and consumer sciences-relevant concepts <strong>OR</strong> career and technical skills.</td>
<td>Students are <strong>participating</strong> in learning tasks <strong>focusing primarily on facts or procedures with little attention to</strong> family and consumer sciences-relevant concepts <strong>OR</strong> career and technical skills.</td>
<td>Students are <strong>engaged in</strong> learning tasks that <strong>address understanding of</strong> family and consumer sciences-relevant concepts <strong>AND</strong> career and technical skills <strong>AND/OR</strong> problem-solving strategies.</td>
<td>Students are <strong>engaged in</strong> learning tasks that <strong>develop understanding of</strong> family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.</td>
<td>Students are <strong>engaged in</strong> learning tasks that <strong>deepen and extend</strong> their understanding of family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.</td>
</tr>
</tbody>
</table>

There is **little or no evidence** that the candidate links students' prior academic learning or personal, cultural, or community assets with new learning.

Candidate makes vague or superficial links between prior academic learning and new learning. Candidate links prior academic learning to new learning. Candidate links prior academic learning AND personal, cultural, or community assets to new learning. Candidate **prompts students to link** prior academic learning AND personal, cultural, or community assets to new learning.
## Rubric 8: Deepening Student Learning

How does the candidate elicit student responses to promote thinking and develop understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidate does most of the talking and students provide few responses.</td>
<td>Candidate primarily asks surface-level questions and evaluates student responses as correct or incorrect.</td>
<td>Candidate elicits student responses related to understanding of family and consumer sciences-relevant concepts AND career and technical skills AND/OR problem-solving strategies.</td>
<td>Candidate elicits and builds on students’ responses to develop understanding of family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.</td>
<td></td>
</tr>
<tr>
<td>OR</td>
<td></td>
<td></td>
<td></td>
<td>Level 4 plus: Candidate facilitates interactions among students so they can evaluate their own abilities to apply family and consumer sciences-relevant concepts, career and technical skills, AND problem-solving strategies.</td>
</tr>
<tr>
<td>Candidate responses include significant content inaccuracies that will lead to student misunderstandings.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Rubric 9: Subject-Specific Pedagogy

How does the candidate use instructional strategies/methods and materials to help students develop an understanding of family and consumer sciences-relevant concepts, career and technical skills, and problem-solving strategies?

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidate uses instructional strategies and materials with little or no attention to family and consumer sciences-relevant concepts OR career and technical skills. OR Materials used in the clips include significant content inaccuracies that will lead to student misunderstandings.</td>
<td>Candidate uses instructional strategies and materials that support surface-level understanding of family and consumer sciences-relevant concepts OR career and technical skills.</td>
<td>Candidate uses instructional strategies and materials that support the understanding of family and consumer sciences-relevant concepts AND career and technical skills AND/OR problem-solving strategies.</td>
<td>Candidate uses instructional strategies and materials that deepen student understanding of family and consumer sciences-relevant concepts, career and technical skills, AND/OR problem-solving strategies.</td>
<td>Level 4 plus: Candidate uses instructional strategies and materials in strategic ways to guide learners to apply learning to their individual, family, AND/OR community lives.</td>
</tr>
</tbody>
</table>

---

Example of strategies used in FCS include: discussion, case-study/scenario analysis, collaborative learning, scientific inquiry, project development, demonstration, experiential learning (e.g., laboratories and service learning), and presentations.
### Rubric 10: Analyzing Teaching Effectiveness

**How does the candidate use evidence to evaluate and change teaching practice to meet students’ varied learning needs?**

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
<th>Level 5</th>

</thead>
<tbody>
<tr>
<td>Candidate suggests changes unrelated to evidence of student learning.</td>
<td>Candidate proposes changes to teacher practice that are superficially related to student learning needs (e.g., task management, pacing, improving directions).</td>
<td>Candidate proposes changes that address students’ collective learning needs related to the central focus.</td>
<td>Candidate proposes changes that address individual and collective learning needs related to the central focus.</td>
<td>Level 4 plus: Candidate justifies changes using principles from research and/or theory.</td>
</tr>
<tr>
<td>Candidate makes superficial connections to research and/or theory.</td>
<td>Candidate makes superficial connections to research and/or theory.</td>
<td>Candidate makes connections to research and/or theory.</td>
<td>Candidate makes connections to research and/or theory.</td>
<td></td>
</tr>
</tbody>
</table>
Assessment Task 3: Assessing Student Learning

What Do I Need to Think About?

In Assessment Task 3, you will analyze both student learning and student use of language. Before you begin the analysis, you need to think about the following:

- How will you gather evidence and make sense of what students have learned?
- How will you provide meaningful feedback to your students?
- How will you use evidence of what students know and are able to do to plan next steps in instruction?
- How will you identify evidence of and explain students’ use of language that demonstrates the development of content understanding?

What Do I Need to Do?

- **Select one assessment from your learning segment you will use** to evaluate your students’ developing knowledge and skills. It should be an assessment to be completed by the whole class featured in the learning segment. (If you are teaching only a group within the class for the learning segment, that group will be “the whole class.”) The assessment should reflect the work of individuals, not groups, but may be individual work from a group task. The assessment should provide opportunities for students to demonstrate
  - conceptual understanding
  - career and technical skills
  - problem-solving strategies

- **Define and submit the evaluation criteria** you will use to analyze student learning related to the family and consumer sciences understandings described above.

- **Collect and analyze student work** from the selected assessment to identify quantitative and qualitative patterns of learning within and across learners in the class. You may submit text files with scanned student work, a video or audio file of a student’s oral work, OR a student-created video or multimedia file. For each focus student, a video or audio work sample must be no more than 5 minutes in total running time. (Note that the oral assessment must be given to the whole class, though not necessarily at the same time.)

- **Select 3 student work samples** that represent the patterns of learning (i.e., what individuals or groups generally understood and what a number of students were still struggling to understand) you identified in your assessment analysis. These students will be your focus students for this task. **At least one of the focus students must have specific learning needs**, for example, a student with an IEP (Individualized Education Plan).
Program) or 504 plan, an English language learner, a struggling reader, an underperforming student or a student with gaps in academic knowledge, and/or a gifted student needing greater support or challenge. Note: California candidates must include one focus student who is an English language learner.8

- **Document the feedback** you gave to each of the **3 focus students** on the work sample itself, as an audio clip, or as a video clip. You must submit evidence of the actual feedback provided to each focus student, and not a description of the feedback.

- If you submit a student work sample or feedback as a video or audio clip and comments made by you or your focus student(s) cannot be clearly heard, do one of the following: 1) attach a transcription of the inaudible comments (**no more than 2 additional pages**) to the end of the Assessment Commentary; 2) embed quotes with time-stamp references in the commentary response; or 3) insert captions in the video (captions for this purpose will be considered permissible editing).

- If you submit a student work sample or feedback as a video or audio clip and additional students are present, clearly identify which students are your focus students in the relevant prompts (1d and 2a) of the Assessment Commentary (**in no more than 2 sentences**).

- **Respond to the commentary prompts** listed in the Assessment Commentary section below after analyzing student work from the selected assessment.

- **Include and submit the chosen assessment**, including the directions/prompts provided to students. Attach the assessment (**no more than 5 additional pages**) to the end of the Assessment Commentary.

- **Provide evidence of students’ understanding and use of the targeted academic language function and other language demands.** You may choose evidence from video clips submitted in Instruction Task 2, an additional video clip of one or more students using language within the learning segment (**no more than 5 minutes in length**), **AND/OR** student work samples submitted in Assessment Task 3.

---

**What Do I Need to Write?**

**Assessment Commentary**

In Assessment Task 3, you will write a commentary, responding to the prompts below. Your commentary should be **no more than 10 single-spaced pages**, including the prompts.

---

8 California candidates—If you do not have any English language learners, select a student who is challenged by academic English.
Attach the assessment used to evaluate student performance (no more than 5 additional pages) and, if necessary, a transcription of inaudible portions of a video or audio clip of feedback or a student work sample (no more than 2 additional pages) to the end of the Assessment Commentary. These additional pages do not count toward the commentary page limit noted above.

1. Analyzing Student Learning
   a. Identify the specific learning objectives measured by the assessment you chose for analysis.
   
   b. Provide a graphic (table or chart) or narrative that summarizes student learning for your whole class. Be sure to summarize student learning for all evaluation criteria submitted in Assessment Task 3, Part D.
   
   c. Use evidence found in the 3 student work samples and whole class summary to analyze the patterns of learning for the whole class and differences for groups or individual learners relative to family and consumer sciences-relevant conceptual understanding
      career and technical skills
      problem-solving strategies

   Consider what students understand and do well, and where they continue to struggle (e.g., common errors, confusions, need for greater challenge).
   
   d. If a video or audio work sample occurs in a group context (e.g., discussion), provide the name of the clip and clearly describe how the scorer can identify the focus student(s) (e.g., position, physical description) whose work is portrayed.

2. Feedback to Guide Further Learning
   Refer to specific evidence of submitted feedback to support your explanations.
   
   a. Identify the format in which you submitted your evidence of feedback for the 3 focus students. Choose one of the following:
      
      - Written directly on work samples or in separate documents that were provided to the focus students
      - In audio files
      - In video clips from Instruction Task 2 (provide a time-stamp reference) or in separate video clips

   If a video or audio clip of feedback occurs in a group context (e.g., discussion), clearly describe how the scorer can identify the focus student (e.g., position, physical description) who is being given feedback.
   
   b. Explain how feedback provided to the 3 focus students addresses their individual strengths and needs relative to the learning objectives measured.
   
   c. Describe how you will support each focus student to understand and use this feedback to further their learning related to learning objectives, either within the learning segment or at a later time.
3. Evidence of Language Understanding and Use

When responding to the prompt below, use concrete examples from the clip(s) and/or student work samples as evidence. Evidence from the clip(s) may focus on one or more students.

You may provide evidence of students’ language use from ONE, TWO, OR ALL THREE of the following sources:

1. Use video clip(s) from Instruction Task 2 and provide time-stamp references for evidence of language use.

2. Submit an additional video file named “Language Use” of no more than 5 minutes in length and cite language use (this can be footage of one or more students’ language use). Submit the clip in Assessment Task 3, Part B.

3. Use the student work samples analyzed in Assessment Task 3 and cite language use.

a. Explain and provide concrete examples for the extent to which your students were able to use or struggled to use the
   - selected language function,
   - vocabulary, AND
   - syntax or discourse to develop content understandings.

4. Using Assessment to Inform Instruction

a. Based on your analysis of student learning presented in prompts 1b–c, describe next steps for instruction to impact student learning:
   - For the whole class
   - For the 3 focus students and other individuals/groups with specific needs

Consider the variety of learners in your class who may require different strategies/support (e.g., students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students).

b. Explain how these next steps follow from your analysis of student learning. Support your explanation with principles from research and/or theory.
How Will the Evidence of My Teaching Practice Be Assessed?

For Assessment Task 3, your evidence will be assessed using rubrics 11–15, which appear on the following pages. When preparing your artifacts and commentaries, refer to the rubrics frequently to guide your thinking, planning, instruction, assessment, and writing.
Assessment Rubrics

Rubric 11: Analysis of Student Learning

How does the candidate analyze evidence of student learning relative to family and consumer sciences-relevant conceptual understanding, career and technical skills, and problem-solving strategies?

</table>
Professional Responsibilities

Refer to the following table for an overview of your professional responsibilities in developing evidence for edTPA. If you are submitting artifacts and commentaries for official scoring, refer to www.edTPA.com for complete and current information before beginning your work. Included here are important information and policies such as submission requirements and deadlines, registration agreements, attestations, permissions, and confidentiality. Whether or not you are submitting for official scoring, you should fulfill the professional responsibilities described below.

<table>
<thead>
<tr>
<th>Responsibility</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Protect confidentiality</td>
<td>To protect confidentiality, please remove your name and use pseudonyms or general references (e.g., “the district”) for your state, school, district, and cooperating teacher. Mask or remove all names on any typed or written material (e.g., commentaries, lesson plans, student work samples) that could identify individuals or institutions. During videorecording, use students’ first names only. To ensure confidentiality of your students and yourself, do not share your video on any publicly accessible platforms or websites (YouTube, Facebook, etc.).</td>
</tr>
<tr>
<td>Acquire permissions</td>
<td>Before you record your classroom instruction, ensure that you have the appropriate permission from the parents/guardians of your students and from adults who appear in the videorecording. Your program will provide you with procedures and necessary forms to obtain these permissions, according to agreements with the school or district in which you are student teaching or completing your internship. If your program does not provide the necessary forms, you may refer to the sample forms found on <a href="http://www.edTPA.com">www.edTPA.com</a>. The release forms are not to be submitted with your materials, but you should follow your campus policy for retaining them.</td>
</tr>
<tr>
<td>Cite sources</td>
<td>Provide citations for the source of all materials that you did not create (e.g., published texts, websites, material from other educators). List all citations by lesson number at the end of the Planning Commentary. Note: Citations do not count toward the commentary page limit.</td>
</tr>
<tr>
<td>Align instruction with state standards</td>
<td>As part of the assessment, you will document the alignment of your lesson plans with state-adopted academic content standards that are the target of student learning. Refer to the education agency website for your state to obtain copies of relevant standards for this assessment.</td>
</tr>
</tbody>
</table>
| Follow the guidelines for candidate support at www.edTPA.com | Follow the guidelines for candidate support found at www.edTPA.com as you develop your evidence for edTPA. Although you may seek and receive appropriate support from your university supervisors, cooperating/master teachers, university instructors, or peers during this process, the ultimate responsibility for completing this assessment lies with you. Therefore, when you submit your completed work, you must be able to confirm your adherence with certain statements, such as the following:  
- I have primary responsibility for teaching the students/class during the learning segment profiled in this assessment.  
- I have not previously taught this learning segment to the students/class.  
- The video clips submitted are unedited (continuous) and show me teaching the students/class profiled in the evidence submitted.  
- The student work included in the documentation is that of my students, completed during the learning segment documented in this assessment.  
- I am author of the commentaries and other written responses to prompts in this assessment.  
- Appropriate citations have been made for all materials in the assessment whose sources are from published text, the Internet, or other educators. |
Family and Consumer Sciences
Context for Learning Information

Use the Context for Learning Information to supply information about your school/classroom context.

About the School Where You Are Teaching

1. In what type of school do you teach? (Type an “X” next to the appropriate description; if “other” applies, provide a brief description.)
   Middle school: _____
   High school: _____
   Other (please describe): _____

2. Where is the school where you are teaching located? (Type an “X” next to the appropriate description.)
   City: _____
   Suburb: _____
   Town: _____
   Rural: _____

3. List any special features of your school or classroom setting (e.g., charter, co-teaching, themed magnet, classroom aide, bilingual, team taught with a special education teacher) that will affect your teaching in this learning segment.

4. Describe any district, school, or cooperating teacher requirements or expectations that might affect your planning or delivery of instruction, such as required curricula, pacing plan, use of specific instructional strategies, or standardized tests.

   11 If you need guidance when making a selection, reference the NCES locale category definitions (https://nces.ed.gov/surveys/ruraled/definitions.asp) or consult with your placement school administrator.

About the Class Featured in this Learning Segment

1. If a course:
   a. What is the name of this course?
   b. What is the length of the course? (Type an “X” next to the appropriate description; if “other” applies, provide a brief description.)
      One semester: _____
      One year: _____
      Other (please describe): _____

2. Is there any ability grouping or tracking in family and consumer sciences? If so, please describe how it affects your class. (Consider ability grouping related to students’ needs, IEP requirements, and program requirements, such as course prerequisites, career paths, and programs of study.)

11 If you need guidance when making a selection, reference the NCES locale category definitions (https://nces.ed.gov/surveys/ruraled/definitions.asp) or consult with your placement school administrator.
3. Identify any textbook or instructional program you primarily use for instruction. If a textbook, please provide the title, publisher, and date of publication.

4. List other resources (e.g., electronic whiteboard/projectors or other AV media, simulators, manipulatives, online resources, laboratory materials/equipment, speakers, internships, field trips) you use for instruction in this class.

About the Students in the Class Featured in this Learning Segment

1. Grade level(s): ________________________________

2. Number of
   - students in the class: ______
   - males: ______ females: ______

3. Complete the charts below to summarize required or needed supports, accommodations, or modifications for your students that will affect your instruction in this learning segment. As needed, consult with your cooperating teacher to complete the charts. Some rows have been completed in italics as examples. Use as many rows as you need.

   Consider the variety of learners in your class who may require different strategies/supports or accommodations/modifications to instruction or assessment: For example, students
   - With Individualized Education Programs (IEPs) or 504 plans
   - With specific language needs
   - Needing greater challenge or support
   - Who struggle with reading
   - Who are underperforming students or have gaps in academic knowledge

   For Assessment Task 3, you will choose work samples from 3 focus students. At least one of these students must have a specified learning need. Note: California candidates must include one focus student who is an English language learner.12

   12 California candidates—If you do not have any English language learners, select a student who is challenged by academic English.
### Students with IEPs/504 Plans

<table>
<thead>
<tr>
<th>IEPs/504 Plans: Classifications/Needs</th>
<th>Number of Students</th>
<th>Supports, Accommodations, Modifications, Pertinent IEP Goals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Example: Visual processing</td>
<td>2</td>
<td>Close monitoring, teacher’s aide, oral presentation of information, graphic organizers</td>
</tr>
<tr>
<td>Example: Physical disabilities (hearing, vision, mobility)</td>
<td>1</td>
<td>Accessible laboratory or alternative, grouping in laboratory or work groups so students can assist each other, division of responsibilities to meet individual student needs</td>
</tr>
</tbody>
</table>

### Students with Specific Language Needs

<table>
<thead>
<tr>
<th>Language Needs</th>
<th>Number of Students</th>
<th>Supports, Accommodations, Modifications</th>
</tr>
</thead>
</table>
| Example: English language learners with only a few words of English | 2 | Pre-teach key words and phrases through examples and graphic organizers (e.g., word cluster, manipulatives, visuals)  
Have students use pre-taught key words and graphic organizers to complete sentence starters |
| Example: Students who speak a variety of English other than that used in textbooks | 5 | Make connections between the language students bring and the language used in the textbook |

### Students with Other Learning Needs

<table>
<thead>

</thead>
<tbody>
<tr>
<td>Example: Struggling readers</td>
<td>5</td>
<td>Provide oral explanations for directions and simplified text for word problems, visual support with text documents, heterogeneous collaborative grouping</td>
</tr>
</tbody>
</table>
Family and Consumer Sciences Evidence Chart

Your evidence must be submitted to the electronic portfolio management system used by your teacher preparation program. Your submission must conform to the artifact and commentary specifications for each task. This section provides instructions for all evidence types as well as a description of supported file types for evidence submission, number of files, response lengths, and other information regarding format specifications. Note that your evidence cannot contain hyperlinked content. Any web content you wish to include as part of your evidence must be submitted as a document file, which must conform to the file format and response length requirements. If you have materials that must be translated into English as per the edTPA Submission Requirements, those translations should be added to the original materials as part of the same file or, if applicable, to the end of the commentary template. There is no page limit for required translations into English.

Planning Task 1: Artifacts and Commentary Specifications

<table>
<thead>
<tr>
<th>What to Submit</th>
<th>Supported File Types</th>
<th>Number of Files</th>
<th>Response Length</th>
<th>Additional Information</th>
</tr>
</thead>
</table>
| Part A: Context for Learning Information             | .doc; .docx; .odt; .pdf | 1               | No more than 4 pages, including prompts                   | • Use Arial 11-point type.  
• Single space with 1” margins on all sides.                                                               |
| Part B: Lesson Plans for Learning Segment           | .doc; .docx; .odt; .pdf | 1               | No more than 4 pages per lesson                           | • Submit 3–5 lesson plans in 1 file.  
• Within the file, label each lesson plan (Lesson 1, Lesson 2, etc.).  
• All rationale or explanation for plans should be written in the Planning Commentary and removed from lesson plans. |
| Part C: Instructional Materials                      | .doc; .docx; .odt; .pdf | 1               | No more than 5 pages of KEY instructional materials per lesson plan | • Submit all materials in 1 file.  
• Within the file, label materials by corresponding lesson (Lesson 1 Instructional Materials, Lesson 2 Instructional Materials, etc.).  
• Order materials as they are used in the learning segment. |
| Part D: Assessments                                 | .doc; .docx; .odt; .pdf | 1               | No limit                                                  | • Submit assessments in 1 file.  
• Within the file, label assessments by corresponding lesson (Lesson 1 Assessments, Lesson 2 Assessments, etc.).  
• Order assessments as they are used in the learning segment. |
| Part E: Planning Commentary (template provided)      | .doc; .docx; .odt; .pdf | 1               | No more than 9 pages of commentary, including prompts     | • Use Arial 11-point type.  
• Single space with 1” margins on all sides.  
• Respond to prompts before teaching the learning segment. |

## Instruction Task 2: Artifacts and Commentary Specifications

<table>
<thead>
<tr>
<th>What to Submit</th>
<th>Supported File Types</th>
<th>Number of Files</th>
<th>Response Length</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part A: Video Clips&lt;sup&gt;13&lt;/sup&gt;</td>
<td>flv, asf, qt, mov, mpg, mpeg, avi, wmv, mp4, m4v</td>
<td>2</td>
<td>2</td>
<td>Running time no more than 10 minutes each (but not less than 3 minutes combined)</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Before you record your video, obtain permission from the parents/guardians of your students and from adults who appear in the video.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Refer to Instruction Task 2, What Do I Need to Do? for video clip content and requirements.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>When naming each clip file, include the number of the lesson shown in the video clip.</td>
</tr>
<tr>
<td>Part B: Instruction Commentary (template provided)</td>
<td>.doc; .docx; .odt; .pdf</td>
<td>1</td>
<td>1</td>
<td>No more than 6 pages of commentary, including prompts</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>If needed, no more than 2 additional pages of supporting documentation</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Use Arial 11-point type.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Single space with 1” margins on all sides.</td>
</tr>
</tbody>
</table>

**IMPORTANT:**
- Insert documentation at the end of the commentary file if
  - you or the students are using graphics, texts, or images that are not clearly visible in the video
  - you chose to submit a transcript for occasionally inaudible portions of the video
  - If submitting documentation, include the video clip number, lesson number, and explanatory text (e.g., “Clip 1, lesson 2, text from a whiteboard that is not visible in the video,” “Clip 2, lesson 4, transcription of a student response that is inaudible”).

---

<sup>13</sup> **Video file size requirements:** The target file size is 200–300 MB or less. The Pearson ePortfolio System file size limit is 500 MB. Please note that each integrated platform provider portfolio system may have additional constraints or requirements regarding video formats and file sizes. You may need to use video tools to compress or transcode your video into smaller file sizes to facilitate uploading of the video. Refer to Recommended Video Formats and Settings on www.edtpa.com for the current requirements.
### Assessment Task 3: Artifacts and Commentary Specifications

<table>
<thead>
<tr>
<th>What to Submit</th>
<th>Supported File Types</th>
<th>Number of Files</th>
<th>Response Length</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part A: Student Work Samples</td>
<td>For written work samples: .doc, .docx, .odt, .pdf</td>
<td>3</td>
<td>No page limit for written work samples</td>
<td></td>
</tr>
<tr>
<td></td>
<td>For audio work samples: flv, asf, wmv, qt, mov, mpg, avi, mp3, wav, mp4, wma</td>
<td>3</td>
<td>No more than 5 minutes per focus student for video or audio student work samples</td>
<td></td>
</tr>
<tr>
<td></td>
<td>For video work samples: flv, asf, qt, mov, mpg, mpeg, avi, wmv, mp4, m4v</td>
<td>3</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Use correction fluid, tape, or a felt-tip marker to mask or remove students’ names, your name, and the name of the school before copying/scanning any work samples. If your students’ writing is illegible, write a transcription directly on the work sample.
- On each work sample, indicate the student number (Student 1 Work Sample, Student 2 Work Sample, or Student 3 Work Sample). If more than one focus student appears in a video or audio work sample, upload the same work sample separately for each focus student who is seen/heard and label appropriately. Describe how to recognize each of the focus students in the clip and provide the label associated with the clip in prompt 1d of the Assessment Commentary.
- When naming each work sample file, include the student number.
- If you submit a student work sample or feedback as a video or audio clip and comments made by you or your focus student(s) cannot be clearly heard, do one of the following: 1) attach a transcription of the inaudible comments (no more than 2 additional pages) to the end of the Assessment Commentary; 2) embed quotes with time-stamp references in the commentary response; or 3) insert captions in the video (captions for this purpose will be considered permissible editing).

(Continued on next page)

---

14 Video file size requirements: The target file size is 200–300 MB or less. The Pearson ePortfolio System file size limit is 500 MB. Please note that each integrated platform provider portfolio system may have additional constraints or requirements regarding video formats and file sizes. You may need to use video tools to compress or transcode your video into smaller file sizes to facilitate uploading of the video. Refer to Recommended Video Formats and Settings on www.edtpa.com for the current requirements.
## Assessment Task 3: Artifacts and Commentary Specifications (continued)

| Part C: Assessment Commentary       | .doc; .docx; .odt; .pdf | 1 1             | No more than 10 pages of commentary, including prompts | - Use Arial 11-point type.  
- Single space with 1" margins on all sides.  
**IMPORTANT:** Insert a copy of the chosen assessment, including directions/prompts provided to students. |
| (template provided)                 |                        |                 |                 |                                                                                       |
| Part D: Evaluation Criteria         | .doc; .docx; .odt; .pdf | 1 1             | No limit        |                                                                                        |
academic language: Oral and written language used for academic purposes. Academic language is the means by which students develop and express content understandings. Academic language represents the language of the discipline that students need to learn and use to participate and engage in the content area in meaningful ways. There are language demands that teachers need to consider as they plan to support student learning of content. These language demands include language functions, vocabulary, discourse, and syntax.

- **language demands:** Specific ways academic language (vocabulary, functions, discourse, syntax) is used by students to participate in learning tasks through reading, writing, listening, and/or speaking to demonstrate their disciplinary understanding.

- **language functions:** The content and language focus of the learning task represented by the active verbs within the learning outcomes. Common language functions in family and consumer sciences include describing relevant concepts, predicting outcomes of decision-making processes related to food choices, comparing nutritional information, summarizing plans to meet nutritional needs for specific populations, justifying dietary choices, evaluating plans of action related to dietary improvement, classifying developmentally appropriate toys, explaining developmentally appropriate childcare settings, and drawing conclusions based on observations in a childcare setting.

- **vocabulary:** Includes words and phrases that are used within disciplines including: (1) words and phrases with subject-specific meanings that differ from meanings used in everyday life (e.g., table); (2) general academic vocabulary used across disciplines (e.g., compare, analyze, evaluate); and (3) subject-specific words defined for use in the discipline.

- **discourse:** Discourse includes the structures of written and oral language, as well as how members of the discipline talk, write, and participate in knowledge construction. Discipline-specific discourse has distinctive features or ways of structuring oral or written language (text structures) that provide useful ways for the content to be communicated. In family and consumer sciences, students examine issues affecting individuals, families, and communities through analyzing real-life scenarios, extracting information from a variety of written and visual sources including journal

---

articles, videos, popular magazines and newspapers, food labels, online sources, and laboratory guidelines. Students also have oral discourse through observing laboratory demonstrations, discussing case studies, and participating in job shadows and service learning. Students express what they have learned through reflective and research writing, recording observations, expressing values, participating in decision-making/planning processes, and practicing career and technical skills such as leadership and management, communicating with diverse audiences, and collaborating with others to solve problems of individuals, families, and communities.

- **syntax**: The set of conventions for organizing symbols, words, and phrases together into structures (e.g., sentences, patterns, food labels, tables).  
- **language supports**: The scaffolds, representations, and pedagogical strategies teachers provide to help learners understand, use, and practice the concepts and language they need to learn within disciplines (Santos, Darling-Hammond, Cheuk, 2012). The language supports planned within the lessons in edTPA should directly support learners to understand and use identified language demands (vocabulary, language function, and syntax or discourse) to deepen content understandings.

**aligned**: Consistently addressing the same/similar learning outcomes for students.

**artifacts**: Authentic work completed by you and your students. Artifacts include lesson plans, copies of instructional and assessment materials, video clips of your teaching, and student work samples. Artifacts are submitted as part of your evidence.

**assessment (formal and informal)**: “[R]efer[s] to all those activities undertaken by teachers and by their students . . . that provide information to be used as feedback to modify teaching and learning activities.” Assessments provide evidence of students’ prior knowledge, thinking, or learning in order to evaluate what students understand and how they are thinking. Informal assessments may include such things as student questions and responses during instruction and teacher observations of students as they work or perform. Formal assessments may include such things as quizzes, homework assignments, journals, projects, and performance tasks.

**assets (knowledge of students)**:

- **personal**: Refers to specific background information that students bring to the learning environment. Students may bring interests, knowledge, everyday experiences, family backgrounds, and so on, which a teacher can draw upon to support learning.
- **cultural**: Refers to the cultural backgrounds and practices that students bring to the learning environment, such as traditions, languages and dialects, worldviews, literature, art, and so on, that a teacher can draw upon to support learning.

---

- **community**: Refers to common backgrounds and experiences that students bring from the community where they live, such as resources, local landmarks, community events and practices, and so on, that a teacher can draw upon to support learning.

**career and technical skills**: These skills emphasize integrated academics, employability, and work-based practices; specific skills that meet industry standards and/or work toward industry-based certification; transferable job skills such as leadership, management, communication, and problem solving; and job preparation skills such as résumé development, mentoring, job shadowing, and applicable service learning.

**central focus**: A description of the important understandings and core concepts that you want students to develop within the learning segment. The central focus should go beyond a list of facts and skills, align with content standards and learning objectives, and address the subject-specific components in the learning segment. For example, the subject-specific components for family and consumer sciences are: conceptual understanding, career and technical skills, and problem solving related to issues affecting individuals, families, and communities. A central focus for the learning segment could be examining relationships between concepts, skills, and problem solving. For example, a learning segment could focus on conceptual understanding of nutritional needs, recording dietary intake using nutritional software, and using decision-making processes to develop meal plans that meet the dietary needs of specific populations. Another learning segment focus might be to identify financial resources, clarify family needs and wants, and use problem-solving processes to develop a budget that meets the financial goals of a family.

**commentary**: Submitted as part of each task and, along with artifacts, make up your evidence. The commentaries should be written to explain the rationale behind your teaching decisions and to analyze and reflect on what you have learned about your teaching practice and your students’ learning.

**engaging students in learning**: Using instructional and motivational strategies that promote students’ active involvement in learning tasks that increase their knowledge, skills, and abilities related to specific learning objectives. Engagement in learning contrasts with student participation in learning tasks that are not well designed and/or implemented and do not increase student learning.

**evaluation criteria**: Performance indicators or dimensions that are used to assess evidence of student learning. They indicate the qualities by which levels of performance can be differentiated and that anchor judgments about the learner’s degree of success on an assessment. Evaluation criteria can be represented in various ways, such as a rubric, a point system for different levels of performance, or rules for awarding full versus partial credit. Evaluation criteria may examine correctness/accuracy, cognitive complexity, sophistication or elaboration of responses, or quality of explanations.

**evidence**: Consists of **artifacts** that document how you planned and implemented instruction **AND commentaries** that explain your plans and what is seen in the videorecording(s) or examine what you learned about your teaching practice and your students’ learning. Evidence should demonstrate your ability to design lesson plans with instructional supports that deepen student learning, use knowledge of your students to inform instruction, foster a positive learning environment that promotes student learning, monitor and assess student progress toward learning objectives, and analyze your teaching effectiveness. Your evidence must be submitted electronically using the electronic portfolio management system used by your teacher preparation program.
**investigation:** Instructional strategy that uses scientific process to investigate and learn about a phenomenon. Scientific process might be used in a food science class to investigate the use of a variety of food preparation techniques on food quality. Another example might be found in an apparel production project where different types of seam finishes are used with a fabric (e.g., French, zig-zag, and flat-felled seams with organza) and evaluated for appearance, strength, and comfort; or when one type of seam is used with a variety of fabrics (e.g., flat-felled seams with organza, double-knit, and denim) and evaluated using the previous criteria, or criteria established for the study.

**learning environment:** The designed physical and emotional context, established and maintained throughout the learning segment to support a positive and productive learning experience for students.

**learning objectives:** Student learning outcomes to be achieved by the end of the lesson or learning segment.

**learning segment:** A set of 3–5 lessons that build one upon another toward a central focus, with a clearly defined beginning and end.

**learning task:** Includes activities, discussions, or other modes of participation that engage students to develop, practice, and apply skills and knowledge related to a specific learning goal. Learning tasks may be scaffolded to connect prior knowledge to new knowledge and often include formative assessment. A sample family and consumer sciences learning task for students in a foods and nutrition course could be: Analyze personal nutritional practices and needs. Record all of the food consumed during the previous day. Compare the food selections with the nutritional guidelines outlined by the United States Department of Agriculture in ChooseMyPlate (www.choosemyplate.gov). Assuming that the daily food consumption reported is representative of a pattern of food consumption, provide an analysis that highlights strengths and makes recommendations to improve the diet.

**patterns of learning:** Includes both quantitative and qualitative patterns (or consistencies) for different groups of students or individuals. Quantitative patterns indicate in a numerical way the information understood from the assessment (e.g., 10 out of 15 students or 20% of the students). Qualitative patterns include descriptions of understandings, misunderstandings, and/or partial understandings that could explain the quantitative patterns (e.g., “given that most students were able to . . . it seems that they understand”).

**planned supports:** Instructional strategies, learning tasks and materials, and other resources deliberately designed to facilitate student learning of the central focus.

**prior academic learning and prerequisite skills:** Includes students’ content knowledge and skills as well as academic experiences developed prior to the learning segment.

**product:** The item(s) produced during a learning segment. Products might include: written reflections or research papers, posters, flyers, brochures, websites, food items/meals, apparel designs and garments, presentations, role-plays, presentation boards, floor plans, financial plans, résumés, job applications, and problem-solving plans.

**project:** An active learning experience in which students plan, implement, and demonstrate possible solutions to issues affecting individuals, families, and communities. A project might include an activity where students identify a need, such as afterschool care for children. The students would develop and implement a series of activities for these children, and then report what they learned in the process of planning and carrying out this project.
rapport: A close and harmonious relationship in which the people or groups understand each other’s feelings or ideas and communicate well with each other.

respect: A positive feeling of esteem or deference for a person and specific actions and conduct representative of that esteem. Respect can be a specific feeling of regard for the actual qualities of the one respected. It can also be conduct in accord with a specific ethic of respect. Rude conduct is usually considered to indicate a lack of respect, disrespect, whereas actions that honor somebody or something indicate respect. Note that respectful actions and conduct are culturally defined and may be context dependent.

rubrics: Subject-specific evaluation criteria used to score your performance on edTPA. These rubrics are included in the handbook, following the directions for each task. The descriptors in the five-level rubrics address a wide range of performance representing the knowledge and skills of a novice not ready to teach (Level 1) to the advanced practices of a highly accomplished beginner (Level 5).

variety of learners: Students in your class who may require different strategies or support. These students include but are not limited to students with IEPs or 504 plans, English language learners, struggling readers, underperforming students or those with gaps in academic knowledge, and/or gifted students.
