UT Martin has received recognition by onlinembareport.com for the high quality of its online Master of Business Administration program. UT Martin was ranked third in Tennessee behind the University of Memphis and UT Chattanooga and 18th in the South in the report. The website highlights the university for its small class sizes, collaborative projects, and leadership and global management-based curriculum.

The Online MBA Report serves as a starting point for prospective online MBA students across the country. The site generates roughly 25,000 user sessions per month, helping organize information so that students can help make individualized decisions about programs. In the past, admissions criteria, tuition costs and enrollment have been factors in the rankings. However, the 2022 rankings were based solely on reputation. More than 400 U.S.-based online MBA programs were evaluated, with UT Martin ranking among the top in each report.

UTM’s Online MBA Program is a high-quality, convenient, practitioner-focused program.

FOOD SUSTAINABILITY – Dr. Rachna Tewari, UT Martin associate professor of agricultural economics and agribusiness, is leading a project designed to strengthen sustainable food production and enhance agricultural productivity.

UT Martin has received a $299,932 grant from the United States Department of Agriculture’s Capacity Building Grants for Non-Land-Grant Colleges of Agriculture program. The grant, entitled “Empowering small farmers and agriculture students: FSAS (Farmers’ School for Agricultural Sustainability) and Experiential Learning Programs,” will benefit a three-year project focusing on strengthening sustainable food production and enhancing agricultural productivity.

The program is being led by Dr. Rachna Tewari, associate professor of agricultural economics and agribusiness. Co-project investigators include Dr. Isaac Lepcha, lecturer of plant and soil sciences; Dr. Joey Mehlhorn, Gilbert Parker Chair of Excellence in agriculture and natural resources and professor of agricultural economics; Dr. Eric Pelren, professor of wildlife biology; Dr. Bethany Wolters, assistant professor of plant and soil sciences; Dr. Stan Dunagan, professor of geology; and Dr. Will Bird, associate professor of agricultural education.

The objective of this project is to build capacity for sustainable agriculture-focused outreach, education and research programs for agricultural communities in West Tennessee and for students at UT Martin, with support from institutional supporter Penn State University in Pennsylvania.

UT Martin will be partnering with the Center for Engaged Learning Abroad in Belize, a program dedicated to providing a wide variety of experimental learning, focused on sustainability. Another partner is the Northwest Tennessee...
Local Food Network located in Martin, which coordinates a thriving and equitable local food system that is accessible to all.

Key strategies to overcoming the challenges associated with global hunger issues are strengthening sustainable food production and enhancing agricultural productivity. The second sustainable development goal of the United Nations specifically highlights the need for promoting sustainable agriculture by empowering small farmers. Smallholder farms are critical to the sustenance of rural economies in the U.S. and face significant constraints owing to increased rural-urban migration, older population involved in farming, consolidation and climate change.

This project primarily aims to strengthen and empower smallholder farms involved in forage-livestock and vegetable production in West Tennessee and Pennsylvania by demonstrating sustainable agriculture practices through research, a producer field school exchange program, the Farmers’ School for Agricultural Sustainability, and an agricultural sustainability and local foods conference.

Another goal is to promote global engagement and cultural awareness among students through an international travel-study program in partnership with Penn State University as part of an embedded course in agricultural sustainability, with a focus on agroecology and indigenous communities. The program also plans to highlight the farmers markets in the region and local food networks to promote sustainability and food self-sufficiency in rural communities.

For more information regarding the grant, contact Tewari at (731)-881-7196 or rtewari@utm.edu.
Cooper Johnson, associate professor of management, was a featured speaker on Go Cloud Careers’s Tech Career Success Factors webinar episode titled “How to Get Hired in a Recession.” The episode has garnered more than 1,300 views by an international audience. Go Cloud Careers has a 20-year history of helping people build elite technology careers.

Ashley Bynum, associate athletic director for internal operations, has received a $75,375 award for a one-year NCAA Accelerating Academic Success Program. Funds will be used for student-athlete mental health programming, academic support staffing and technology upgrades. This award is Bynum’s second NCAA grant, and she currently holds a 100% success rate for multiple grant proposals.

UT MARTIN RECOGNIZES FACULTY PROMOTIONS, AWARDS AND TENURE STATUS – UT Martin recently hosted an annual dinner for faculty members who have received promotions and awards or gained tenure status during the current calendar year. Pictured are (seated, l-r) Dr. Julie Floyd, Dr. Shannon Chi, Dr. Elizabeth Stratton, Dr. Clinton Smith, Dr. Will Bird, Dr. Joshua Guerin and Jason Stout; (middle row, l-r) Dr. Dexter Davis, Dr. Sam Faught, Dr. Joey Mehlhorn, Dr. Carrie Humphreys, Dr. Margaret Lewis, Dr. Timothy Dasinger, Dr. Justin Sims, Dr. Nancy Buschhaus, Dr. Keith Carver, Dr. Bryan Foltz; (back row, l-r) Dr. Danny Walker, Dr. Clint Ary, Sarah Haig, Dr. Alissa Parrish, Cindy West, Dr. Lynn Alexander, Dr. Ahmad Tootoonchi and Dr. Erik Nordberg.

ATTEND FOOTBALL OPENING GAME - Chancellor Keith Carver is joined by Tennessee Secretary of State Tre Hargett (center) and State Rep. Tandy Darby (R-District 76), of Greenfield, during the Skyhawks’ opening home football Sept. 1 at Hardy M. Graham Stadium. Hargett was elected by the Tennessee General Assembly to serve as Tennessee’s 37th secretary of state in 2009 and was re-elected in 2013, 2017 and 2021. Darby is a 1996 UT Martin graduate and assumed office Nov. 3, 2020.
POWERING UP – City, county, business and other officials were among those attending an announcement ceremony Aug. 30 when the Weakley County Municipal Electric System officially became the first local power company in Tennessee to install Electric Vehicle fast chargers as part of TVA’s regional Fast Charge Network. Two EV fast chargers located outside Martin City Hall became part of the Fast Charge TN program developed by TVA and the Tennessee Department of Environment and Conservation. Participating in the event and ribbon-cutting ceremony were Jake Bynum, Weakley County mayor; Betsy Kirk McCall, Seven States Power Corp. president and CEO; Randy Brundige, Martin mayor; Andrea Harrington, WCMES general manager; David Salyers, Tennessee Department of Environment and Conservation commissioner, and Jeff Lyash, TVA president and CEO. In addition to this event, the TVA board of directors held its quarterly business meeting Aug. 30-31 in the Boling University Center’s Duncan Ballroom.

WINTERS TO DISCUSS ‘THE MAGIC BEAN’ DURING SOYBEAN FESTIVAL WEEK

The UT Martin Research Series returns with a timely presentation about soybean research during the Tennessee Soybean Festival. Dr. Todd Winters, dean of the College of Agriculture and Applied Sciences, will review his career-long research into soybeans with his presentation titled “The Magic Bean: Utilization of Soybeans and Effects on Mammalian Physiology.”

The presentation is free and open to the public and will start at 12:30 p.m. on Thursday, Sept. 8, in the north reading room of the library. Light refreshments will be served, and attendees are welcome to bring their lunch for the event. The presentation will be livestreamed at this link and archived for later viewing. The monthly research series highlights the research of campus faculty, staff and students and is co-sponsored by the university’s Division of Academic Affairs and the Paul Meek Library.

Moving beyond farm production of soybeans, Winters’ work has focused on the physiological effects of soybean consumption. Soybeans and their products, including tofu, miso, and animal feed, deliver high levels of isoflavone proteins that impact glucose and lipid levels in humans and other mammals.

Winters joined UT Martin in 2013 following 19 years at Southern Illinois University. A native of Washington state, Winters’ research has been published in the “Journal of Medicinal Food,” the “Journal of Biomedicine and Biotechnology” and “FASEB,” the journal of the Federation of American Societies for Experimental Biology. In June 2022, Winters took office as president of the North American Colleges and Teachers of Agriculture (NACTA).

Parking for the reception will be in the Paul Meek Library parking lot on Wayne Fisher Drive off Mt. Pelia Road. Parking permits are available online at www.utm.edu/departments/publicsafety by selecting the “Online Visitor Parking Permit” link.

For more information, contact Dr. Erik Nordberg, library dean, at 731-881-7070.
You Tell Me

**Question** – Why are there so many interim positions on campus now? Wasn’t that a SACS issue last time? Will it be an issue in the upcoming reaccreditation?

**Answer** – In the SACSCOC reaffirmation process, having a number of interim positions becomes an issue if there are other concerns such as financial shortfalls or a negative campus climate that are the underlying causes for people leaving. Most of the interim positions at the university are because the people who were in those positions have moved on to more prominent positions at other places. This should not be an issue in the upcoming reaccreditation, because the university can document why many of the people who formerly occupied those positions left.
